**Subject:** Re: Acreage

Phase 2 is 440 acres, so each 1 percent = 4.4 acres. Thus 21% = 92.4 acres and 15% = 66 acres. The difference is 26.4 acres.

As discussed, in Phase 1 there was about 15% capping on bedrock/clay/shorelines, and about 22% in non-B/C/S areas. 22% in Phase 2 would = 96.8 acres.

**Subject:** Acreage

What is the acreage difference between 21 percent total capping and 15 percent total capping? Thanks
